

Seriously?

## LEGO® SERIOUS PLAY® Gets Serious Results

Frank is licensed and trained to use LEGO® SERIOUS PLAY® methodology.

LEGO® SERIOUS PLAY® methods and materials are creative & interactive problem solving tools developed specifically to help businesses find solutions to common – and uncommon – business problems. The application draws on extensive research from many fields including psychology, business, education, and sociology.

The basic belief is that **people can gain deeper understanding of themselves and their peers when they play, explore, experiment, and use their hands** to “build” their thoughts.

This process encourages 100% participation so people can test concrete ideas to problem-solve sometimes intangible concepts and interchange possible solutions. Once teams develop clear and accurate mental models, they can develop goals and create action steps that they can immediately implement.
